Professional Summary

I am a freelance Full Stack Web Developer specializing in building modern, responsive, and performance-driven web applications. I focus on delivering clean, scalable solutions that help businesses establish a strong online presence and improve user experience. With hands-on experience across frontend and backend technologies, I enjoy turning ideas into functional products and continuously refining systems for speed, usability, and maintainability. I value clear communication, reliability, and long-term client partnerships.

Technical Skills

Frontend

HTML5, CSS3, TypeScript, React, Tailwind CSS

Backend

Node.js, Next.js

Databases

PostgreSQL, MongoDB, Supabase

Tools & Workflow

Git, GitHub, Linux, VS Code, Postman

Other

Responsive Design, REST APIs, Performance Optimization, Cross-Browser Compatibility

Freelance & Professional Experience

Assistant Web Developer – Techno Skills

- Collaborated with senior developers to design, build, and maintain responsive websites and web applications
- Improved performance and usability of an e-commerce platform through cleaner code structure and UI enhancements

- Tested applications across browsers and devices to ensure consistency and reliability
- Identified and resolved technical issues efficiently, contributing to on-time project delivery
- Gained real-world experience in production-level development, debugging, and teamwork

Freelance Web Development Projects

- Developed custom websites and interfaces using modern frontend frameworks
 - Implemented responsive layouts optimized for mobile, tablet, and desktop
 - Integrated backend functionality and databases for dynamic data handling
 - Focused on performance, maintainability, and clear user experience
 - Worked independently to plan, build, and iterate on web solutions
-

Education

BSc Computer Science & Mathematics

University of Derby — Ongoing

Relevant focus areas include software development, problem-solving, and computational thinking.

Additional Skills

- Strong communication skills with the ability to translate client requirements into technical solutions
 - Bilingual communication supporting international collaboration
 - Content creation and visual editing experience (CapCut Pro, Adobe Illustrator)
 - Comfortable working independently or within distributed teams
-

Personal Interests

Outside of development, I maintain a disciplined and creative lifestyle through sports, fitness, and content creation. These activities reinforce consistency, problem-solving, and creative thinking qualities I apply directly to my work as a developer.
